

(Erratum) An $f(R)$ gravitation for galactic environments

R. Saffari and Y. Sobouti

Institute for Advanced Studies in Basic Sciences, P. O. Box 45195-1159, Zanjan, Iran

Abstract. Without abstract

Key words. cosmology: theory – cosmology: dark matter – gravitation – galaxies: photometry

We regret that an initially typographical error in the geodesic equations, Eq. (15) of (Sobouti 2007), has propagated through the paper. Corrections are as follows:

$$\frac{d^2 r}{d\tau^2} + \frac{1}{2} \frac{A'}{A} \left(\frac{dr}{d\tau} \right)^2 - \frac{r}{A} \left(\frac{d\varphi}{d\tau} \right)^2 + \frac{1}{2} \frac{B'}{A} \left(\frac{dt}{d\tau} \right)^2 = 0, \quad (15)$$

$$\frac{J^2}{r^3} = \frac{1}{2} \frac{B'}{B^2}, \quad (20)$$

$$v^2 = \frac{1}{2} \frac{rB'}{B} = \frac{1}{2} \left(\alpha - \frac{rA'}{A} \right), \quad (22)$$

$$v^2 = \frac{1}{2} \alpha + \frac{1}{2} \left(1 - \frac{1}{2} \alpha \right) \frac{\left(\frac{s}{r} \right)^{1-\alpha/2} + 2\lambda \left(\frac{r}{s} \right)^{2(1-\alpha/2)}}{1 - \left(\frac{s}{r} \right)^{1-\alpha/2} + \lambda \left(\frac{r}{s} \right)^{2(1-\alpha/2)}}, \quad (23)$$

$$v^2 = \frac{1}{2} \alpha c^2 + \frac{GM}{r} \left[1 - \frac{1}{2} \alpha \left\{ 1 + \ln \left(\frac{2GM}{c^2 r} \right) \right\} \right]. \quad (24)$$

Numbers following each equation are the equation numbers of (Sobouti 2007).

In table 1, column 5, $2(v_\infty/c)^2 \times 10^{-7}$ and in column 6, $\alpha_0 \times 10^{-7}$ are the correct headings. For *NGC 801* the asymptotic velocity, v_∞ is 208 km/s, corresponding to $\alpha_0 = 2.71 \times 10^{-7}$. The changes are minute and in no way alter the conclusions of the paper.
